Re:SkyMarshall GPS Services

To Whom It May Concern:

The Wood Automotive Group has been using SkyMarshall's GPS product for 4 months now and we are extremely happy with the results. There are no software costs or monthly fees to worry about. We are using the product mainly for our Sub-Prime lease division and we have seen an immediate reduction in arrears, repossessions, and other problems that can occur in this portfolio. The product is very easy to install and because it is a web-based product, we are able to monitor, locate, etc. our units from work, home, or any computer we are working at. We also plan on having our Business Office and Fleet Dept. sell the product as an anti-theft/monitoring device for their customers as well.
